

*What's new in perfection?*

*Presenting Hurd Monument  
Light Commercial Windows & Patio Doors.*

**MONUMENT**  
LIGHT COMMERCIAL  
WINDOWS FROM HURD

# What is perfection?

*At Hurd, perfection is a mission. One we've been on for over 90 years. Building a reputation for custom-crafted windows and doors in homes around the world. At the same time, we've also become experts in architectural and light commercial applications. The culmination? Presenting the Hurd Monument line: light commercial wood windows and patio doors for new construction and remodeling, including architecturally accurate wood windows and doors for historic renovation. All fully supported by training, education, technical assistance and dedicated professional personnel within Hurd's newly formed Architectural Services Group.*

# *What the Hurd Architectural Services Group brings to the table.*

*Every commercial construction job presents unique and diverse challenges. Along with our distributor partners, our Architectural Services Group can be a valuable resource in ensuring your project's success.*

*Our approach is personal. And solutions-driven. We'll work with you as a team, presenting custom options, and consulting on shop drawings and CAD plans.*

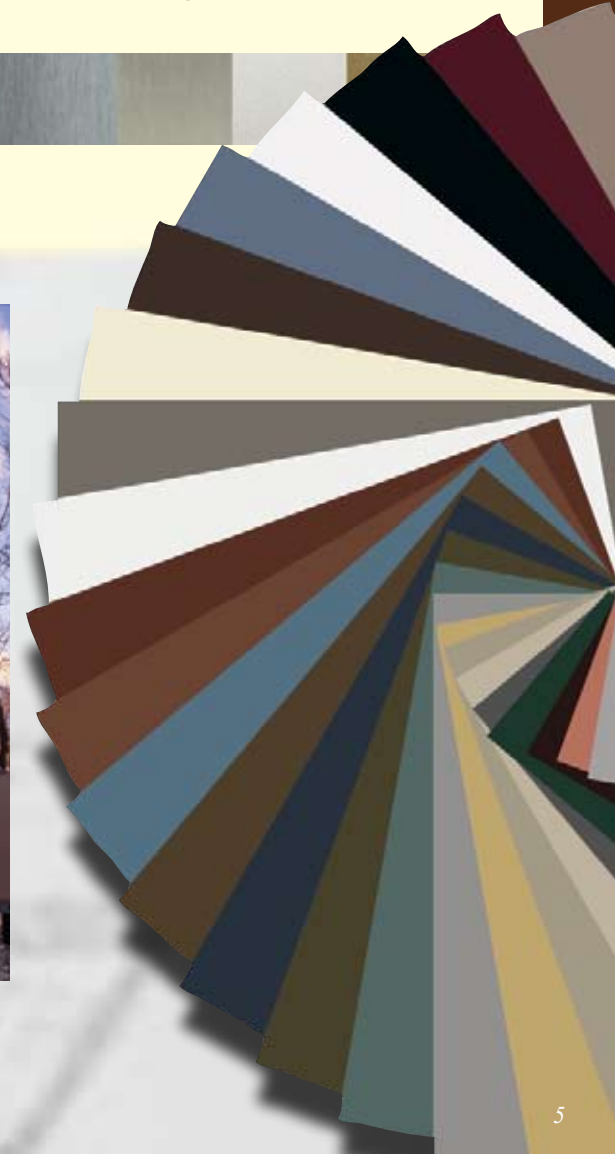

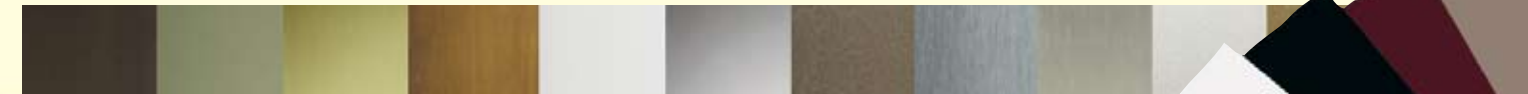

*Hurd  
Architectural  
Services Group*

*We'll give you staged delivery and factory ideas that will save you time and money on the jobsite. Offering solutions as simple as our durable Ultra Coat factory paint, factory mulling or complete factory assembly of trim, subsills and design options. Or solutions as complex as meeting your project's DP ratings and compliance codes.*

*Specifying the perfect commercial windows and doors isn't easy.*

*The Hurd Architectural Services Group is here to make it easier.*

# Monument doors and windows: *A testament to toughness.*

The Hurd Monument line is led by our aluminum clad wood windows and doors. This product group is all about heavy-duty wood construction and extra-thick extruded aluminum clad.

Our Monument single hung window carries a remarkable Heavy Commercial rating of HC40\*. With our aluminum clad products, you'll choose from a wealth of construction enhancements, including a rigid nailing fin option. The Monument line also includes our Historic Series of doors and windows. This is true all-wood construction at its finest. And with our ability to custom match historic profiles and trim details, it's the perfect way to preserve or restore your project's original craftsmanship—with all the benefits of modern, energy-efficient engineering. Whatever you're looking for in light commercial projects, Hurd's Monument line has it. With countless size, color, wood, hardware, glass and grille options, plus the capability to

and grille options, plus the capability to customize to your exact specifications.

\* Sizes also available with an LC55 rating.

## *Historic Series*

## *The Club at Longview case history.*

*The Club at Longview features the only residential course in the Charlotte region to earn a place in Golf Digest's prestigious 'Best in State' rankings.*

Anodized aluminum  
cladding color options

## 99.9% UV perfection.

Hurd offers a wide range of glazing options. Including the superior protection of ClimaGuard SPF™. ClimaGuard SPF dramatically extends the useful life of furniture, floor and wall coverings, photographs and even window treatments. It also blocks excessive solar heat gain and maximizes natural daylight. Without dark tints, colored glass or shiny reflections.

In fact, it's the first clear glass treatment to give you 99.9% protection from both the sun's damaging UV-A and UV-B rays.

## Free anodizing.

Anodizing gives the aluminum on your Hurd clad wood windows and patio doors a harder, more durable finish. It's the perfect complement to the warmth and beauty of the interior wood. And Hurd is the only company to offer it at no extra charge.

Anodizing allows aluminum to maintain its original metallic appearance, even with frequent surface cleanings. Its extremely long life span saves on maintenance costs. And its resistance to ultraviolet rays prevents chipping and peeling. Choose from clear, champagne, light bronze, medium bronze and dark bronze.

NOTE: Anodizing is an electrolytic passivation process used to increase the thickness of the natural oxide layer on the surface of metal parts. Anodizing increases corrosion resistance and wear resistance. Due to printing limitations, the colors in this catalog are only a representation of actual colors. See your local distributor for actual color samples.

## *Building green.*

*Green building results in more efficient use of energy, materials and water. It lowers operating costs, improves comfort and health, and it can even lessen the strain on local infrastructure. Today, green building encompasses design, site development, construction efficiencies, overall operation and maintenance.*

*One of the easiest decisions anyone can make when it comes to green building is to simply choose Hurd windows and doors. Hurd products have always offered superior energy efficiency, durability and performance. In fact, we've been green since 1919.*

*Using Monument windows and doors in your light commercial projects can help towards earning points for U.S. Green Building Council's (USGBC) Leadership in Energy and Environmental Design (LEED) certification. Contact the Hurd Architectural Services Group for a listing of how Hurd Monument products can help your projects meet LEED certification.*

# *What is perfection?*

*We think of perfection as a journey. It's something we strive for every day in every product we make. And even though we may never achieve absolute perfection, the quest for it has given our Hurd family a tremendous amount of pride and satisfaction. We think you'll sense it in the beauty and performance of Hurd windows and doors.*
